Art Unit: 1714

1. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. It is unclear which component is the “respective component” because there is not antecedent basis for this term.

2. Claims 3 and 20 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the modifications disclosed in the instant enabling specification, does not reasonably provide enablement for all encompassed modifications. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

A. The instant claims recite “and modifications thereof” regarding the claimed compounds. There are an infinite number of such modifications encompassed. It would require undue experimentation to determine what all of these modifications are and then to determine which modifications would function in the instantly claimed invention.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting

Art Unit: 1714

ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-11 and 13-20 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-15 and 17-19 of copending Application No. 10/783885, which has been allowed but has not issued yet. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the instant claims differ somewhat in scope, the practice of the instantly claimed invention is rendered obvious by the large overlap in scope with the copending claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st and 2nd paragraph, set forth in this Office action.

A. US Pat. Nos. 3674716 Kijkhuizen et al., 2916464 Ebneith et al., and 3211674 Sandridge are representative of the closest prior art. However, these references do not disclose the instantly claimed catalysts for use in the instantly claimed coatings nor provide rationale for their use in such coatings. For the reasons argued by the applicant in the instant specification, these references might be seen as teaching away from the instantly claimed invention.
